Profile

Computer Science undergraduate with an emphasis on **Systems Programming**, **Cloud Architecture**, and **Machine Learning**. Experienced in developing automated ETL pipelines, enterprise CRM solutions, and low-level hardware-interfacing applications.

Experience

SmartBridge | Salesforce Developer Intern — **May 2025 – July 2025**

- **Architected HandsMen Threads**, a fashion CRM solution utilizing **Apex Triggers**, **SOQL**, and **Salesforce Flows** for workflow automation.
- **Integrated SkillWallet** decentralized identity protocols to establish secure, verifiable role-based access control.
- **Designed real-time Analytics Dashboards** to track sales trends, customer engagement, and inventory.
- **Achieved Agentblazer Champion status** by completing the **Apex Specialist** and **LWC Basics** superbadges.

Freelancer | Custom Programming Solutions — **Nov 2024 – Present**

- **Developed optimized C/C++ modules** for academic use, focusing on algorithmic efficiency in sorting and file-handling .

Certifications

- **Oracle Certified Professional: Java SE 17 Developer** (Issued: Feb 12, 2026)
- **Salesforce Developer Agentblazer Champion** – SmartBridge
- **Apex Specialist Superbadge** – Salesforce Trailhead

Projects

AWS Data Lake Continuum | Automated ETL Pipeline

- **Engineered a serverless data pipeline** using **AWS Lambda, S3, and Glue** to automate ingestion and transformation.
- **Implemented event-driven architecture** where raw uploads trigger real-time ETL processing and cataloging.
- **Leveraged Amazon Athena** for serverless SQL queries and utilized **Pandas** for data visualization.

Chronic Kidney Disease Prediction | Machine Learning

- **Developed an ML pipeline** using **Scikit-Learn** and **Random Forest** to identify patient risk factors.
- **Applied SMOTE** for class imbalance and **StandardScaler** for normalization to enhance model reliability.
- **Deployed a Flask interface** enabling clinicians to input parameters for real-time risk assessment.

Inter-Process Communication (IPC) System | Operating Systems

- **Engineered IPC modules** using **Pipes** and **Message Queues** in C for synchronized process coordination.
- **Implemented a Producer-Consumer model** using `fork()` and `msgget()` system calls for data transfer.

Tic-Tac-Toe Game | 8086 Assembly Language

- **Programmed low-level logic** in **x86 Assembly**, utilizing memory segmentation and register manipulation.
- **Utilized BIOS Interrupts (INT 10h, 21h)** for VGA screen buffer management and input validation.

Technical Skills

Languages: Python, C, C++, 8086 Assembly, Apex (Salesforce), Java SE 17, PHP, JavaScript .
Cloud & Tools: **AWS (S3, Lambda, Glue, Athena)**, **Salesforce (LWC, SOQL, Flows)**, Git, Streamlit.
Core Concepts: OS (IPC), Data Structures, Computer Architecture, Algorithm Optimization.

Education

SRM University AP — **2023 – 2027**
B.Tech in Computer Science Engineering | **Current CGPA: 7.56 / 10**

Sri Bhavishya Junior College — **2021 – 2023**
Intermediate (MPC) | **Score: 879 / 1000**
