SUMMARY

B.Tech student in Computer Science and Engineering at SRM University AP with a focus on web development and programming. Skilled in building functional applications and delivering solutions through hands-on practice. Enthusiastic about leveraging code for problem-solving and system optimization. Seeking opportunities to apply and enhance my skills..

WORK EXPERIENCE

- 1. Project Developer – Online Shopping System (November 2024)** – Developed a C++ application simulating an online shopping platform, including core features such as product browsing, order handling, and basic user interaction.
- 2. Freelancer – Custom Programming Solutions (November 2024 – Present)** – Designed C programs tailored for educational use, delivering logic-based solutions involving sorting techniques and filehandling mechanisms.

PROJECTS

University Academic Projects

1. Online Shopping System

Developed a console-based C++ application enabling product search and purchase simulation, with a strong emphasis on modular programming and file I/O operations .

2. Spotify Clone

Developed a clone interface using HTML, CSS, JavaScript, PHP, and Spotify API tokens. Built a responsive UI that replicates the Spotify platform, enabling features such as track playing, playlist display, and backend integration. Utilized the Spotify Developer API to fetch and render data efficiently .

3. Online Election

Developed a console-based Online Election System in C language, implementing core functionalities such as candidate registration, voter authentication, and secure vote casting using file handling and modular programming. Designed a user-friendly menu-driven interface to streamline the voting process and prevent duplicate voting through validation mechanisms.

EDUCATION

2023 - 2027	Btech (CSE) at SRM AP University	(Current GPA: 3.01/4.0)
2021 - 2023	Intermediate MPC Course(2 years) at Sri Bhavishya Junior College, Vijayawada	(score :879/1000)
2021	Class 10th AP State Board, St. John's High School	(10.0 GPA)

SKILLS

- Proficient in C, C++
- Web Development (HTML, CSS, JavaScript,PHP – if applicable)
- File handling
- Problem-solving
